

Partial Selection of Cremation Only Containers

In keeping with our commitment to give you as much information as we can, following is a partial selection of frequently selected cremation containers from our display. Our physical display at Beck's Tribute Center has 16 cremation only containers made of wood, wood veneers, hardboard, wood fiber materials and carboard laminates. Only 8 of those are shown here. We also have a catalog of readily available cremation suitable containers. The most expensive cremation suitable casket we have sells for \$8,500. Our cremation containers range in price from as much as \$3,550 down to as little as \$75.

If you see a container you are interested in, call one of our directors
